Exciting Career Opportunities for BSc / BCA / BCS Graduates

TCS is the leader in the global marketplace and among the top 10 technology firms in the world. Our continued rapid growth is a testament to the certainty our clients experience every day. Building on more than 40 years of experience, we add real value to global organizations through domain expertise plus solutions with proven success in the field and world-class service. It's how we keep you moving forward.

We are looking for eligible BSc / BCA / BCS Graduates and who are driven by passion and are interested to make career in IT Industry. Exciting career opportunities are available in different phases of **Software Development Life Cycle (SDLC)** in IT projects and as a **Service Desk Engineer** in IT Infrastructure Service (IT IS) projects. You could be mapped to any one of the profiles based on the project requirements and your skills.

As a team member of an IT project you get a chance to work on software development life cycle which includes Software Development, Software Testing, and Production Support etc. You get a chance to work on different programming languages, technologies, domains and platforms.

As a Service Desk Engineer in IT IS department, you become a single point of contact between Users and IT Service Management. Tasks include handling incidents and requests, and providing an interface for other key business processes. The primary functions of the Service Desk are incident control, life cycle management of all service requests, and communicating with the customer.

IT IS department is the key to any organization to keep the computers up and running 24 hours a day and 365 days a year which enables the delivery of good business results all over the world. The services cover Data Centers which house Servers, Storage, Databases, Security, Networks, and so on. With emerging technologies such as cloud computing and an on-demand IT environment, IT Infrastructure services has shown phenomenal progress and growth in the last two decades.
